

# Welcome to Whalley Range Science

Welcome to Whalley range science department!! Below is a picture of the laboratories you could be working in next year. We have two science blocks spread across one building. Our laboratories are spacious and clean with all the resources that you will need to be a flourishing scientist!

← This is a picture of a plug socket that you will find on your desk that you will use in your science lessons

Below is a picture of the equipment that you might expect to see at your desk. Gas taps provide us with flammable methane to use for our Bunsen burners. The sink is used for rinsing our non-hazardous liquids. We only use these for practical activities!

We also have a science workroom in A block. This is often the best place to find your science teacher.
