

GCSE PE

I am sure everyone has seen the outcome from the [Ofqual consultation](#) on NEA arrangements for Summer 2022.

Component 3: Practical

For candidates certificating in summer 2022, they will only be assessed in 2 activities - this can be 2 team, 2 individual or 1 team and 1 individual (from the list in the specification).

We are waiting further guidance about the process for moderation. As soon as I have more information, I will share it in an update.

Component 4: Personal Exercise Programme

The PEP requires the candidate to collect performance data at the beginning and the end of the PEP. We understand the difficulty that some candidates are experiencing when trying to collect performance data from a formal/competitive situation during the COVID-19 restrictions.

For candidates certificating in Summer 2022, they **MUST** continue to collect performance data at the beginning and end of the PEP, but if a candidate cannot collect performance data from a game/competitive situation, then for assessment in summer 2022 only, the performance data can be collected from a practice/skill session.

For example:

- In netball the candidate may gather performance data from the number of chest passes in 30 secs
- In basketball a candidate may gather performance data from the number of baskets scored in 25 attempts.

The candidates must then use this data, to analyse and evaluate a PEP.

Please note: there are no changes to the assessment criteria.

For candidates certificating in Summer 2022, we would accept all candidates offering the same activity and the same method of training - but they must all be individualised and targets must be set for each candidate.
